DETAILED ACTION

Drawings

1. New corrected drawings are required in this application because the application is in condition for allowance. Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

Allowable Subject Matter

2. Applicant's arguments, filed November 21, 2005, with respect to claims 1-30 have been fully considered and are persuasive.

3. The prior art of record does not teach or suggest, individually or in combination, a method of updating kernel tunables comprising: updating a system file and persistent storage mechanism with a new tunable value in response to a single administrator request, and changing a tunable value in the kernel without any centralized interface changes and continuing to run the computer with the updated tunable value.
